

## Lashing system ERGO 50mm STF 500 daN LC 2500daN

### Produktinformation

The Ergo lashing system features an ergonomically designed tensioner with a longer handle and reversed tension direction, providing a natural movement during operation. This design delivers 30% higher tensioning force compared to conventional lashings. By using Ergo, the number of top-over (friction) lashings required for securing goods can be significantly reduced.

Ergo lashings are cost-effective, commonly used by transport companies, and suitable for all types of cargo carriers. They offer a higher lashing capacity (LC) than standard lashings, ensuring improved performance. All components are rigorously tested to guarantee exceptional durability and safety.

The strap is made of high-strength polyester webbing, providing both flexibility and durability. The system also offers a Standard Tension Force (STF) of 500 daN at a Standard Hand Force (SHF) of 50 daN.

**Kennzeichnung:** nach Norm

**Standard:** EN 12195-2
