

Smartbar FORANKRA HD

Product information

SMARTBAR HD is a locking bar for professionals involved in the transport of vans and commercial vehicles (dimensions on request).

It is important that drivers, craftsmen and suppliers have the right equipment in their vehicle. With a locking capacity of 400 daN, this beam makes it easy to lock the load and secure the goods by restricting movement in the event of braking or evasive manoeuvres.

The practical and ergonomic SMARTBAR HD can be positioned with a single movement thanks to the handle, which allows the cap to be easily positioned in the fixing rail.

The dimensions of the H1, H2 or H3 commercial vehicles can be adapted on request.

Material: Aluminium

LC daN	Height m	Diameter mm	Weight kg	Delivery time
400	2.2-2.4	19 or 24	2.9	12
