

# MULTI-STICK STRAP-GO function

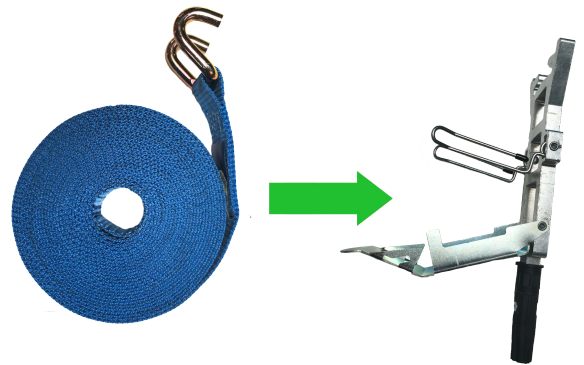

## User Manual

**A**  
Wrap the strap evenly.

*The use of a strap winder ref : 48879 12 can make the process easier*

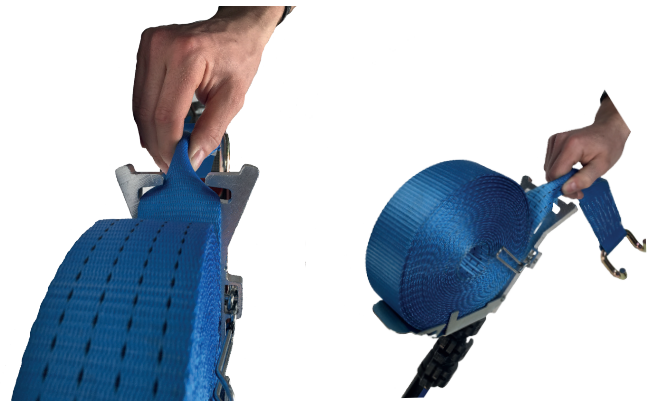

**B**  
Insert the wrapped strap between the two spring

**C**  
Put the strap on the shovel's tool being careful of the unwinding direction.

**D**  
On the hook side, pinch the end of the strap and insert it into the slot provided for this purpose.

**E**  
Adjust the height of the handle. Only the STRAP-GO head must exceed the height of the loads.

**F**  
Put your hands on the handle's foam part.

# User Manual

**G**

Put yourself at +/- 50cm from the trailer.

**H**

The angle between the handle and the edge of the trailer must not exceed 30°.

**I**

It is highly recommended not to touch the load with the handle during the strap launch.

**J**

Launch the strap above the load with a quick pulse and let it roll on the other side.

**K** Take back and fix the hook on the anchor point or edge.

On the other side of the semi, tension the strap using the awning tightener.
