Absortest™

Product information

Container Conditions Monitoring Service

With Absortest technology, take full control over the safety and quality of your goods during transport. The system provides real-time monitoring of conditions regardless of the transport mode—road, rail, sea, or air.

Key Features:

• Four-function sensor kit:
Monitors temperature, humidity, door openings, and shocks.

• Advanced mobile connectivity:
Data transmission via 4G/5G LTE networks with 2G backup ensures stable connectivity in all conditions.

• Ease of use:
Built-in LCD screen allows quick checks of device activation, connectivity, battery level, and current temperature.

• Long battery life:
120 days of uninterrupted operation thanks to an efficient lithium-ion battery.

• Durability and resilience:
Waterproof housing (IP64) protects the device from water and dust.

• Detailed reporting and data analysis:
Data can be downloaded via USB or in PDF format.

Advantages of the Absortest System:

• Transport optimization:
Accurate data on container conditions enables a swift response to any irregularities.

• Full control over cargo:
Remote real-time monitoring capability.

• Support for transport validation:
Tests and analyses help improve the protection of goods from humidity and other harmful factors.
